Spanish — Native
English — Professional

HOBBIES

Dominoes, working out, travel, tech enthusiast

PROFILE

Dynamic Frontend Developer specializing in JavaScript and TypeScript, with a strong focus on creating intuitive user interfaces using React.js. Committed to enhancing functionality and user experience through innovative design and efficient code. Expertise in Agile methodologies ensures alignment with project goals while delivering high-quality results. Leverages AI-assisted development tools (Cursor, GitHub Copilot) to accelerate delivery while maintaining full ownership of code quality — reviewing, testing, and understanding every change rather than shipping unverified output. Thrives in collaborative environments, continuously contributing to team success, project excellence, and personal growth.

EMPLOYMENT HISTORY

Lead Frontend Developer — Front10 / PROS, Miami

July 2023 — Present

- Lead Frontend Developer for a highly customizable and responsive Flight Search and Booking Engine, transforming designs into efficient, high-quality, and tested code.
- Developed and maintained features for a highly adaptable interface, tailored to the unique needs of various airline clients.
- Utilized Agile methodologies to estimate tasks and prioritize work effectively, ensuring alignment with project goals.

Live: Azores Airlines · Cyprus Airways

Founder & Developer — WorkInWeb, Miami

September 2024 — Present

- Founded WorkInWeb to create simple, affordable websites for small businesses.
- Help businesses establish a strong online presence without the high costs typically associated with web development.
- Delivered client sites including Kindly Hearts Homecare, The Florida Clinics Aesthetics, Snappy Kit, and EZ2Chart.

Frontend Developer — Front10 / Woxo, Miami

November 2021 — July 2023

- Spearheaded the implementation of multiple modules for an innovative online video creation tool.
- Leveraged JavaScript and TypeScript with modern libraries like React.js to build UIs, manage data flow, and implement tests.
- Redesigned modules to enhance efficiency, resulting in substantial performance improvements.
- Developed and enhanced a core video library for seamless playback and customization of in-flight video.
